

SICHERHEIT²

The advantages of the HMS RONDO 3-way+ autolock now on video

The safety of our carabiners is an absolute matter of honor for us; that's why also our HMS RONDO 3-way autolock meets all expectations regarding easy handling and tangible safety. However, also a 3-way twist-lock isn't immune to manipulation by the rope or other objects. That's why we went the extra mile for your safety and developed the HMS RONDO 3-way+ autolock!

The safety plus – SAFELOCK

The name of the SAFELOCK function of this carabiner speaks for itself: In the original position, this carabiner can be opened like a 3-way carabiner by lifting, turning and pushing the lock. SAFELOCK offers an addition locking possibility which makes another step necessary to bring the carabiner back to its closed original position. A plus – for even more safety in every situation!

In our new [video](#), we compare the 3-way autolock and the 3-way+ autolock and show you, how the HMS RONDO 3-way+ autolock with SAFELOCK works.

The new Data Protection Law of the European Union (GDPR) sets new standards for the transparency and responsibility of companies which work with and process personally provided data. We take this opportunity to inform you about the protection of your personal data as well as about the rights you have as regards receiving this newsletter.

The protection of your data is of great importance to us. Thus, it goes without saying that the personal data you provide us with is not supplied to any third party. You can at any time make use of your right to correct (update) the data, obtain information regarding the data or delete the data. Simply send us an e-mail with your specific request to datenschutz@austrialpin.at.

In what context, to what extent and for which purposes we and our business associates process the data obtained from you, can be found in our [Data Protection Declaration](#).
