AUSTRIALPIN EXPLAINS: "ANSI"

Information on AUSTRIALPIN ANSI components and the American norm

Not every change is always in line with the inventor's plans. That is why also we at AUSTRIALPIN had to rename our ANSI components, as the word "ANSI" must not be contained in a product name.

The main difference between the regular COBRA® PRO STYLE models and those which comply with the requirements of the ANSI standard is the breaking load. In the future, we will therefore indicate the tensile strength breaking load for components that are certified according to the ANSI standard also in the product name. This way, the buckle model can be clearly identified straight away.

In practice, the following product names will be changed:

<u>Product name OLD</u>	<u>Product name NEW</u>
ANSI COBRA® PRO STYLE	COBRA® PRO STYLE 18 kN
ANSI D-RING COBRA® PRO STYLE	D-RING COBRA® PRO STYLE 18 kN
ANSI COBRAFRAME	COBRAFRAME 18 kN
ANSI D-RING COBRAFRAME	D-RING COBRAFRAME 18 kN
ANSI RING	RING 22 kN

ALREADY CERTIFIED FOR YOU

Nearly all COBRA® components which comply with the ANSI norm already have a valid ANSI norm certification according to the ANSI/ASSE standard Z359.12-2019.

WHICH BENEFITS DOES THIS HAVE FOR AUSTRIALPIN CUSTOMERS?

When certifying your products, you will save extra effort and costs for the certification of the used AUSTRIALPIN components.

We will gladly provide you with all the necessary documents for this process!
