

## Good grip with a disinfectant effect.

Liquid chalk has many advantages over loose chalk: it lasts a very long time, offers perfect grip and it reduces the fine dust in climbing and boulder gyms.

Furthermore, the **CHALKER Liquid Chalk** by **AUSTRIALPIN** offers another big advantage: it contains **not less than 70% Ethanol** which makes this liquid chalk also have a **disinfectant effect**. This makes it the perfect chalk solution during times of Corona/Covid-19.

Because it is in the interest of all of us to reduce the spread of the virus Covid-19, we offer you a **discount of 20%** on our CHALKER Liquid Chalk (100ml bottle)\*.

The CHALKER Liquid Chalk is currently only available in the practical 100ml bottle. The larger 250ml bottles will only be available again in spring 2021. Since Liquid Chalk is very economical and, once opened, dries out after a certain time, the small bottle makes the most sense for most climbers anyway.

---

### Get your 20% discount on CHALKER Liquid Chalk (100ml)\*

\*The offer is valid for all orders that we received by October 18, 2020 and while stocks last.
