

Glue-in bolts – now available again in all lengths! With new marking, but in proven quality.

The wait is over - our warehouse is well stocked again!

Glue-in bolts, bolt hanger and all kinds of top anchor devices are waiting to be brought to the rock by busy developers and restorers.

As of now, the glue-in bolts are again available in the following lengths:

ART.NO.	MATERIAL	LENGTH	P.U.
HB01AL.20	stainless steel 316L	75 mm	20 pcs.
HB11AL.20	stainless steel 316L	90 mm	20 pcs.
HB21AL.20	stainless steel 316L	110 mm	20 pcs.

>> note the latest UIAA anchor corrosion warning <<

EN 959:2018

class of material

The glue-in bolts have also been re-marked:
"CLASS OF MATERIAL NO 2"

What does "Class of Material No 2" mean?

Since the new edition of the CE standard (EN959:2018), all types drilling material are divided into 3 classes depending on the material used, which describe the respective corrosion resistance.

Anchor devices that belong to the Class of Material No 2 can be used for bolting outdoors. They must not be used in surroundings with aggressive influences like a high content of salt or chlorine in the air, as there is on and near the coast or at indoor swimming pools. These influences may lead to [stress corrosion cracking failure](#).
